

FinalWire Unveils AIDA64 v7.40

Enhanced SHA3 Benchmark and AMD Ryzen 9000 Optimizations

BUDAPEST, Hungary - Oct 22, 2024 - FinalWire Ltd. today announced the immediate availability of AIDA64 Extreme 7.40 software, a streamlined diagnostic and benchmarking tool for home users; the immediate availability of AIDA64 Engineer 7.40 software, a professional diagnostic and benchmarking solution for corporate IT technicians and engineers; the immediate availability of AIDA64 Business 7.40 software, an essential network management solution for small and medium scale enterprises; and the immediate availability of AIDA64 Network Audit 7.40 software, a dedicated network audit toolset to collect and manage corporate network inventories.

The latest AIDA64 update introduces an enhanced SHA3 benchmark, AVX-512 accelerated benchmarks for AMD Ryzen 9000 processors, and supports the latest graphics and GPGPU computing technologies by AMD, Intel and nVIDIA.

New features & improvements

- AVX-512 accelerated benchmarks for AMD Ryzen 9000 “Granite Ridge” CPU
- Enhanced support for AMD X870 and X870E chipset motherboards
- Improved support for hybrid processors
- Further optimized SHA3 benchmark on AVX-512 capable processors
- Improved support for Zhaoxin ZX-7000 CPU
- GPU details for AMD Radeon Pro W7900 Dual Slot
- GPU details for nVIDIA H200

What’s new since AIDA64 v7.00

- Dark Mode with 3 dark themes
- Revamped user interface with configurable toolbar
- Icelandic localization
- AVX-512 accelerated benchmarks for AMD Ryzen AI “Strix” APU
- AVX-512 accelerated benchmarks for AMD Ryzen Threadripper 7000 Series processors
- AVX2 optimized benchmarks for Intel “Meteor Lake” SoC
- Enhanced support for AMD TR5 socket motherboards
- Chipset information for AMD TRX50 and WRX90
- Improved support for Intel “Arrow Lake”, “Lunar Lake”, “Panther Lake” processors
- NZXT Kraken 2023 and Kraken Elite sensor support
- Gskill WigiDash LCD support
- Microsoft Windows 11 2023 Update support
- Preliminary support for Intel “Clearwater Forest” and “Panther Lake” CPU
- ACPI 6.5 support
- GPU details for AMD “Granite Ridge”, Radeon RX 6750 GRE 12GB, Radeon RX 7600 XT
- GPU details for nVIDIA GeForce RTX 4000 Super Series
- Retired Queen benchmark

Pricing and Availability

The AIDA64 product family for Windows PCs consists of three business editions and a home edition. The company's flagship IT asset management offering with hardware diagnostic features is AIDA64 Business, while a dedicated network inventory solution called AIDA64 Network Audit is also available, for a lower license fee. Designed for corporate engineers and IT technicians, AIDA64 Engineer includes expert tools not available in AIDA64 Extreme, the home edition of the software. Today all four AIDA64 editions are updated to v7.40.

About FinalWire

AIDA64 is developed by FinalWire Ltd., headquartered in Budapest, Hungary. The company's founding members are veteran software developers who have worked together on programming system utilities for more than two decades. Currently, they have ten products in their portfolio, all based on the award-winning AIDA technology: AIDA64 Extreme, AIDA64 Engineer, AIDA64 Network Audit, AIDA64 Business and AIDA64 for Android, iOS, Sailfish OS, Ubuntu Touch and Windows Phone.
