FinalWire Announces AIDA64 v8.00

AIDA64 v8.00 introduces a host of powerful new features

BUDAPEST, Hungary - Sep 15, 2025 - FinalWire Ltd. today announced the immediate availability of AIDA64 Extreme 8.00 software, a streamlined diagnostic and benchmarking tool for home users; the immediate availability of AIDA64 Engineer 8.00 software, a professional diagnostic and benchmarking solution for corporate IT technicians and engineers; the immediate availability of AIDA64 Business 8.00 software, an essential network management solution for small and medium scale enterprises; and the immediate availability of AIDA64 Network Audit 8.00 software, a dedicated network audit toolset to collect and manage corporate network inventories.

The latest AIDA64 update brings faster 64-bit performance, better multi-monitor and DPI scaling support, new GPU benchmarks for NVIDIA GeForce RTX 5000 Series, improved localization with full Unicode, Windows PE v3.0+ compatibility, and a new compressed SPZIP format for smaller SensorPanel layouts.

New features & improvements

- Native 64-bit binaries, new compiler, faster startup and operation
- OpenCL support for NVIDIA GeForce RTX 5000 Series GPUs
- Dynamic DPI scaling (per-monitor DPI awareness)
- Improved handling of multiple monitors
- Unicode string handling, improved localization, fixed Windows codepage issues
- Windows PE v3.0+ support
- SPZIP file format for more compact SensorPanel layouts
- Improved support for Intel Nova Lake CPU
- Corsair iCUE Nexus LCD support
- Preliminary support for Intel Nova Lake-L CPU
- Turing (Turzx) 9.2-inch LCD support
- GPU details for Intel Arc Pro B50, Arc Pro B60
- GPU details for nVIDIA GeForce RTX 5090 D v2

Compatibility with previous Windows versions

The move to a modern compiler and native 64-bit binaries has also resulted in a significant shift: AIDA64 v8.00 will no longer support 32-bit Windows versions or Windows XP x64. While this decision was necessary to modernize the software and enable the new features, it marks a clear direction towards supporting the latest operating systems and hardware.

Pricing and Availability

The AIDA64 product family for Windows PCs consists of three business editions and a home edition. The company's flagship IT asset management offering with hardware diagnostic features is AIDA64 Business, while a dedicated network inventory solution called AIDA64

Network Audit is also available, for a lower license fee. Designed for corporate engineers and IT technicians, AIDA64 Engineer includes expert tools not available in AIDA64 Extreme, the home edition of the software. Today all four AIDA64 editions are updated to v8.00.

About FinalWire

AIDA64 is developed by FinalWire Ltd., headquartered in Budapest, Hungary. The company's founding members are veteran software developers who have worked together on programming system utilities for more than two decades. Currently, they have ten products in their portfolio, all based on the award-winning AIDA technology: AIDA64 Extreme, AIDA64 Engineer, AIDA64 Network Audit, AIDA64 Business and AIDA64 for Android, iOS, Sailfish OS, Ubuntu Touch and Windows Phone.
