FinalWire Launches AIDA64 v8.20

SensorPanel and OSD Panel improvements and AMD Radeon RX 7700 support

BUDAPEST, Hungary - Dec 09, 2025 - FinalWire Ltd. today announced the immediate availability of AIDA64 Extreme 8.20 software, a streamlined diagnostic and benchmarking tool for home users; the immediate availability of AIDA64 Engineer 8.20 software, a professional diagnostic and benchmarking solution for corporate IT technicians and engineers; the immediate availability of AIDA64 Business 8.20 software, an essential network management solution for small and medium scale enterprises; and the immediate availability of AIDA64 Network Audit 8.20 software, a dedicated network audit toolset to collect and manage corporate network inventories.

The new AIDA64 update introduces SensorPanel and OSD Panel improvements, support for the latest Turing external displays, and supports the latest graphics and GPGPU computing technologies by AMD, Intel and nVIDIA.

New features & improvements

- Turing (Turzx) 5.2-inch and 8-inch LCD support
- Optimized memory bandwidth benchmark run times on AMD Milan, Rome, Shimada Peak processors
- GPU details for AMD Radeon RX 7700
- GPU details for nVIDIA RTX Pro 6000D Blackwell
- Fixed: SensorPanel and OSD Panel positioning issues after sleep, suspend, system restart
- Fixed: RemoteSensor character encoding issues

Pricing and Availability

The AIDA64 product family for Windows PCs consists of three business editions and a home edition. The company's flagship IT asset management offering with hardware diagnostic features is AIDA64 Business, while a dedicated network inventory solution called AIDA64 Network Audit is also available, for a lower license fee. Designed for corporate engineers and IT technicians, AIDA64 Engineer includes expert tools not available in AIDA64 Extreme, the home edition of the software. Today all four AIDA64 editions are updated to v8.20.

About FinalWire

AIDA64 is developed by FinalWire Ltd., headquartered in Budapest, Hungary. The company's founding members are veteran software developers who have worked together on programming system utilities for more than two decades. Currently, they have ten products in their portfolio, all based on the award-winning AIDA technology: AIDA64 Extreme, AIDA64 Engineer, AIDA64 Network Audit, AIDA64 Business and AIDA64 for Android, iOS, Sailfish OS, Ubuntu Touch and Windows Phone.
