

FinalWire Rolls Out AIDA64 v8.25

Smarter Monitoring, Broader Hardware Support

BUDAPEST, Hungary - Feb 24, 2026 -

FinalWire Ltd. today announced the immediate availability of AIDA64 Extreme 8.25 software, a streamlined diagnostic and benchmarking tool for home users; the immediate availability of AIDA64 Engineer 8.25 software, a professional diagnostic and benchmarking solution for corporate IT technicians and engineers; the immediate availability of AIDA64 Business 8.25 software, an essential network management solution for small and medium scale enterprises; and the immediate availability of AIDA64 Network Audit 8.25 software, a dedicated network audit toolset to collect and manage corporate network inventories.

The latest AIDA64 update focuses on deeper hardware integration, improved display customization, and expanded international accessibility. With enhanced SensorPanel flexibility, broader LCD support, and new monitoring capabilities for next-generation components, AIDA64 continues to deliver detailed system insight for enthusiasts and enterprise environments alike.

New features & improvements

- Azerbaijani localization
- Revamped SensorPanel monitor pinning for more precise multi-display positioning
- Native NVMe support for improved detection and reporting
- MSI MPG Ai1300TS and Ai1600TS power supply monitoring support
- WeAct LCD display support
- Improved SensorPanel positioning stability

AIDA64 Command Line Builder

Alongside the v8.25 release, FinalWire introduces the new AIDA64 Command Line Builder, an online tool designed to simplify the creation of command line parameters. The web-based utility allows users to generate properly structured switches quickly and accurately, reducing configuration errors and improving automation workflows in enterprise deployments. Command line options are available exclusively in our business product line. Available at: <https://www.aida64.com/user-manual/command-line-builder>

Pricing and Availability

The AIDA64 product family for Windows PCs consists of three business editions and a home edition. The company's flagship IT asset management offering with hardware diagnostic features is AIDA64 Business, while a dedicated network inventory solution called AIDA64 Network Audit is also available, for a lower license fee. Designed for corporate engineers and IT technicians, AIDA64 Engineer includes expert tools not available in AIDA64 Extreme, the home edition of the software. Today all four AIDA64 editions are updated to v8.25.

About FinalWire

AIDA64 is developed by FinalWire Ltd., headquartered in Budapest, Hungary. The company's founding members are veteran software developers who have worked together on programming system utilities for more than two decades. Currently, they have ten products in their portfolio, all based on the award-winning AIDA technology: AIDA64 Extreme, AIDA64 Engineer, AIDA64 Network Audit, AIDA64 Business and AIDA64 for Android, iOS, Sailfish OS, Ubuntu Touch and Windows Phone.
