

FinalWire Introduces AIDA64 v8.35

Support for AMD Zen 6 and the latest PC Hardware

BUDAPEST, Hungary – July 28, 2026 - FinalWire Ltd. today announced the immediate availability of AIDA64 Extreme v8.35, a streamlined diagnostic and benchmarking tool for home users; AIDA64 Engineer v8.35, a professional diagnostic and benchmarking solution for corporate IT technicians and engineers; AIDA64 Business v8.35, an essential network management solution for small and medium-sized enterprises; and AIDA64 Network Audit v8.35, a dedicated network audit toolset for collecting and managing corporate network inventories.

The latest AIDA64 update enhances support for next-generation AMD Zen 6, AMD Mustang Peak, and Intel Panther Lake-R processors. It also adds support for new LCD display solutions, USB-NVMe passthrough for the Asus ROG Strix Aiolos, and hardware detection for the AMD Radeon RX 6300 GPU.

New features & improvements

- Improved support for AMD Zen 6 based CPUs and APUs
- Preliminary support for AMD Mustang Peak CPU
- Preliminary support for Intel Panther Lake-R CPU
- Thermalright Trofeo Vision 9.16 LCD support
- Turing (Turzx) 2.8-inch LCD support
- Waveshare LCD support
- GPU details for AMD Radeon RX 6300
- GPU details for nVIDIA RTX Spark N1X
- USB-NVMe passthrough support for Asus ROG Strix Aiolos
- Fixed: crash in the OpenCL layer
- Fixed: handle leak in ROG AIO LCD module

Compatibility with previous Windows versions

The move to a modern compiler and native 64-bit binaries has also resulted in a significant shift: AIDA64 v8.xx will no longer support 32-bit Windows versions or Windows XP x64. While this decision was necessary to modernize the software and enable new features, it marks a clear direction towards supporting the latest operating systems and hardware.

Pricing and Availability

The AIDA64 product family for Windows PCs consists of three business editions and a home edition. The company's flagship IT asset management offering with hardware diagnostic features is AIDA64 Business, while a dedicated network inventory solution called AIDA64 Network Audit is also available, for a lower license fee. Designed for corporate engineers and IT technicians, AIDA64 Engineer includes expert tools not available in AIDA64 Extreme, the home edition of the software. Today all four AIDA64 editions are updated to v8.35.

About FinalWire

AIDA64 is developed by FinalWire Ltd., headquartered in Budapest, Hungary. The company's founding members are veteran software developers who have worked together on programming system utilities for more than two decades. Currently, they have ten products in their portfolio, all based on the award-winning AIDA technology: AIDA64 Extreme, AIDA64 Engineer, AIDA64 Network Audit, AIDA64 Business and AIDA64 for Android, iOS, Sailfish OS, Ubuntu Touch and Windows Phone.
